

Chapter (1)

Digital Marketing

What is digital marketing

- Digital marketing helps to create consumer demand by using the power of the interconnected, interactive web. It enables the exchange of currency but, more than that, it enables the exchange of attention for value. This is

Digital marketing is powerful in two fundamental ways:

- ▶ First, the audience can be segmented very precisely – even down to factors like: current location and recent brand interactions – which means that messages can (and must) be personalized and tailored specially for them.
 - ▶ Second, the digital sphere is almost completely measurable – every minute and every click by a customer can be accounted for. In digital you can see exactly how various campaigns are performing, which channels bring the most benefit, and where your efforts are best focused.
- 

Digital marketing strategy

- ▶ Digital marketing strategy builds on and adapts the principles of traditional marketing, using the opportunities and challenges offered by the digital medium. A digital marketing strategy should be constantly iterating and evolving. Since the Internet allows for near-instantaneous feedback and data gathering, digital marketers should constantly be optimising and improving their online marketing efforts.
- 

Crowdsourcing

- ▶ Crowd sourcing: is a powerful example of the way digital tools have enabled certain ways of thinking. In simple terms, crowd sourcing is a distributed problem-solving and production model that relies on an active community to find solutions to problems. Crowd sourcing relies heavily on the tools and communication forms made possible by the Internet.
- 

Crowdsourcing

- ▶ 1. Crowd sourcing, which involves asking and enabling people to share their ideas or creations in exchange for an emotional or monetary reward. This is the most common type used for marketing and idea generation. Websites such as Threadless (www.threadless.com), Idea Bounty (www.ideabounty.com) and Wikipedia (en.wikipedia.org) are prime examples of crowd sourcing.

Crowdfunding

- ▶ 2. involves asking many people in a large crowd each to donate a small amount of money in order to gather a large sum to fund a specific project or venture. Kick starter (www.kickstarter.com) is a well known platform where people who want to start projects can ask for backers to fund them. The higher the contribution, the more the backer will receive once the project is complete.

Microtasking

- ▶ which involves breaking a big task or project down into tiny components and asking many people to each complete a few of these components, usually for payment. One company that uses micro-tasking is: Brands Eye (www.brandseye.com), which pays members of its crowd to evaluate the sentiment behind mentions in social media.

Defining Content marketing

- ▶ *Content marketing: is a marketing technique of creating and distributing relevant and valuable content to attract, acquire, and engage a clearly defined and understood target audience – with the objective of driving profitable customer action.*

- ▶ Content components:
 - ▶ • Substance: Who are you trying to reach, and why?
 - ▶ • Structure: Where is your content? How is it organized? How do people find your content?
